

AHPS CURRICULUM PLANNER

Message from the CEO

Dear Learners,

“Dr. Kalam used to say, ‘The purpose of Education is to make good human beings with skill and expertise. Enlightened human beings can be created by teachers.’ Changes in the education policy are important to provide the nation good students, professionals & better human beings.”

—Narendra Modi

Keeping in line, the Head Office has revised the textbooks and curriculum for Classes I-V for the upcoming academic session. The new Term-Books categorise the entire syllabus in two sections, making the curriculum dynamic and approachable. Moreover, the innovative books are in consonance with the guidelines laid down by the National Education Policy (NEP, 2020) in addition to the National Curriculum Framework. The entire curriculum is based on—

- recognizing, identifying and fostering the unique capabilities of students by sensitizing teachers as well as parents to promote students' holistic development in both academic and non-academic spheres.
- promoting conceptual learning rather than rote learning.
- encouraging creative, analytical and critical-thinking skills.
- focussing on ‘How to Think’ instead of ‘What to Think’.
- providing quality education and decreases mental and physical burden.
- promoting formative assessment, peer assessment and holistic report card to measure the ongoing academic progress of the learners.

We, at AHPS, believe that students across India should be provided with the best education. Therefore, the new curriculum includes integrated textbooks. These books contain project-based activities as well as subject-enrichment knowledgeable facts useful for enhanced learning. In addition to that, the Robotic Science curriculum for Classes III to V takes students a step further by introducing STEM education.

We believe that all our schools will implement this Curriculum/Academic Planner with a new zeal and invigorated enthusiasm.
